CORE

- Java 7-25
- Spring Boot & REST API & Hibernate & JPA
- React & JavaScript & CSS & HTML & Vite
- Microservices & Kubernetes & Docker
- MCP servers
- Swagger & OpenAPI
- Kafka & ActiveMQ
- PostgreSQL & MySQL
- Amazon S3
- Liquibase
- Git & GitHub & GitHub Actions
- GCP
- Jenkins

TESTING

- Postman
- JUnit 5 & Mockito

DESKTOP & UI

- SWT & Eclipse RCP
- NatTable & Nebula
- Swing
- OpenWebStart

LANGUAGES

- English - advanced
- Romanian - native

SOFT SKILLS

- Highly organized
- Take ownership and responsibility
- Proactive
- Solution-oriented mindset

PROFILE

Full-Stack Developer | Java Backend Focus

- **Strong AI skills:** prompt engineering, embeddings, vector search, RAG, LLM integration, AI agents, MCP (Model Context Protocol), AI-assisted development, AI workflow automation
- **5 years experience as Java developer on backend side of Web Applications;**
- **12 years** experience as Java developer for **Desktop** SWT applications;
- Integrations with Twilio, GPT, Gemini, Grok, DeepSeek,Mailtrap, Serp API;
- Modernizing legacy systems (Java 8→21, Java 21→25, Eclipse→IntelliJ);

WORK EXPERIENCE

JUN 2026 — PRESENT

Full-Stack Developer (FTE/CIM) @adesso | Timișoara

- Developed MCP server, spring-boot based
- Developed a chatbot connected to local documents and to 3 AI models

Tech stack: Java 25, React, Terraform, GCP, AWS, Kubernetes, AI embeddings, AI models from hugging face and ollama

FEB 2026 — MAY 2026

Java Backend Developer (FTE/CIM) @IBM | Timișoara

- Integrated Kafka-based notifications into the document processing flow.
- Introduced the first unit and integration tests for the application.
- Worked on backend integration with external partner systems via REST APIs.
- Implemented new API endpoints.

Tech stack: Apache Kafka, Java 17, IntelliJ IDEA, Maven, GitLab, Spring Framework, Spring Boot, REST APIs, JUnit, Java Development, Camunda BPM

JUN 2021 — DEC 2024

Lead/Senior Developer (contract) @NTT Data | Timișoara

- Led a team of **six developers** from NTT DATA Vietnam in a collaborative project for a European car manufacturer. I made architectural decisions and designed the microservices and the database structure;
- Strong hands-on coding experience
- Developed with my team a new Spring-based microservices to manage user rights;
- Designed and implemented a new Spring-based microservice to integrate with multiple partner systems and retrieve data on demand;
- I did the transition from Eclipse to IntelliJ and transition from Java 8 to Java 21.

Tech stack: Java 8-21, SWT, NatTable, Eclipse RCP, REST API, Microservices, Jenkins, Spring Boot, PostgreSQL, JPA, Docker, Kafka, Kubernetes, Caas, Paas, SonarQube, Unit Tests, Swagger Code Gen, Swagger Doc, Git, GitHub, Maven, IntelliJ, OpenAPI, OWS, Dynatrace, Hexagonal Architecture for desktop app.

PORTFOLIO

- **AI Assistant for Natural Medicine**

  AI-powered natural medicine chatbot that uses local knowledge sources and RAG to provide evidence-based personalized recommendations

- **JobsHunter**

  Finds job opportunities for users using AI, the Serp API, and ethical web scraping.

- **Metal-Investment**

  Real-time precious metals arbitrage calculator monitoring Bloomberg / Galmarley prices vs. Revolut rates. Built with Java, Spring Boot, Docker, GCP, REST API, scheduled jobs.

- **Simple Contacts**

  Spring Boot address book with login, contact CRUD, Kafka sign-up events, MySQL persistence, and a Dockerized weather microservice companion.

EDUCATION

- **Bachelor's Degree,** Faculty of Mathematics and Informatics, University of Craiova | 2001 - 2005

CERTIFICATIONS

- Google UX Design Professional Certificate (2025)
- Leadership courses — LinkedIn (2025), MasterClass (2022)

OCT 2020 — MAY 2021

Mid-level Developer (contract) @P4B | Cluj-Napoca

- Maintained existing rules written in Drools and implemented new ones for approving patient requests to receive physical devices covered by the National Health Insurance Fund;
- Implemented new API's;
- I processed a new message type received from ActiveMQ.

Tech stack: Java 8, Drools, REST API, Jenkins, Microservices, Spring Boot, ActiveMQ, Git, Github, Maven, InteliJ.

JAN 2020 — MAY 2020

Senior Java Engineer @Zenitech | Cluj

- Worked on the gateway of a planning platform, focusing on unit, integration tests and http requests filters;
- I simplified several processes with each release and created a series of Confluence pages after consulting with many people;

Tech stack: Java 9, Spring Boot, REST API, CORS, Unit tests, System tests, Application tests, PiTest, Maven, Git, Github, Maven, InteliJ, Splunk.

APR 2018 — NOV 2019

Senior Java Developer @Synopsis(QTronic) | Cluj

- Worked as part of a 10-developer team on a desktop application used by engineers at a European car manufacturer to simulate car ECUs and monitor their real-time status;
- Developed an INI file editor using SWT;
- Built a custom framework from scratch to display real-time vehicle signals, leveraging the JOGL library, which is based on OpenGL.

Tech stack: Java 8, SWT, JOGL, Maven, Git.

NOV 2007 — APR 2018

Java Developer @Konecranes (TBA) | Satu-Mare

- Developed Java-based desktop applications for simulation purposes in the container terminal logistics domain;

Projects that I worked on:

- **Graphical Terminal Editor (GTE)** - Built from scratch in Java (Eclipse RCP, SWT) and maintained for 10 years. Used internally to design and edit container terminal layouts, enabling management to secure new contracts. Integrated with several TBA products, including a virtual terminal emulator for optimizing container flow.
- **Boxhunter Crane Interface** – Built from scratch in C#, implementing low-level communication between autonomous cranes and the port's operating system.
- **TCM** - Maintained a Java/Open Web Start/Swing-based tool.

Tech stack: Java 7, SWT, Eclipse RCP, Swing, OpenWebStart, C#, ANT, CVS, Bugzilla, Waterfall Methodology.

APR 2006 — SEP 2007

Junior C++ Developer @FUNLABS | Bucharest

- Implemented special effects and 2D elements in multiplatform games: Cabela's Big Game Hunter and Cabela's African Safari.

Tech stack: C++, Internal Game Engine.
